

A full-size "toe pincher" casket uses 1¼ sheets of 4x8 OSB/plywood, or one 4x10 sheet.

Use blocking in all corners and along the bottom piece seams.

Hinge the lid along one of the lower sides. Or to hide equipment, cut the lid 18" up from the bottom, and then thru the middle of the upper part, and double hinge. Screw hinges into blocks, not just OSB.

# TP Casket Construction
